

ObjectRef

```
classDiagram
    class ObjectRef {
    }
    class tvm_te_IterVarRelation {
        + IterVarRelation()
        + IterVarRelation()
        + operator->()
    }
    tvm_te_IterVarRelation --|> ObjectRef
```

The diagram shows a class hierarchy. At the top is a class box for 'ObjectRef' with three empty compartments. Below it is a class box for 'tvm::te::IterVarRelation' with three compartments: the top for the class name, the middle for attributes (empty), and the bottom for methods. A blue arrow with an open triangle head points from the 'tvm::te::IterVarRelation' box up to the 'ObjectRef' box, indicating inheritance.

tvm::te::IterVarRelation

+ IterVarRelation()
+ IterVarRelation()
+ operator->()
